Dear Hiring Manager,

I am writing to express my interest in data analyst opportunities at your organization. As a current Bachelor of Science student in Physics with an Astronomy concentration at Appalachian State University, I've developed a strong foundation in scientific problem-solving, programming, and data interpretation. With hands-on experience using SQL, Python, Excel, and Tableau Public, I'm eager to contribute my skills to help turn data into actionable insights.

My experience as a Student Research Assistant has provided me with the opportunity to work with real-world data, utilizing Python to analyze spectroscopy from ion trap experiments at NIST. I've presented technical findings and collaborated with faculty on research, sharpening both my analytical and communication skills. Additionally, my online portfolio showcases multiple end-to-end data projects that reflect my passion for uncovering stories in data.

I'm excited by the opportunity to bring curiosity, adaptability, and technical knowledge to your team. Thank you for considering my application. I would welcome the chance to discuss how I can support your team's data goals.

Sincerely,

David Salgado
